I. Main duties of the research unit in 2012

In 2012 the Institute of Sociology was operating as part of the Centre for Social Sciences, structured into four research department.

The four departments with their highlighted tasks can be summarised as follows:

1) Research Department for Social Inequalities

Main research tasks: social and economic inequalities; the inequalities of opportunities, gender inequalities, research of the sociology of families, minorities, migrants, ageing, young people, poverty, the determinations of social policy and its institutions.

2) Research Department for Knowledge, Values, and Culture

Main research tasks: information- and knowledge-based society, information and communications technology, risk awareness and risk management, non-governmental organisations, political cultures, technology and knowledge economy, research into values, culture and media. The department includes the Voice of the 20th Century Archives, which performs essential public service tasks.

3) Research Department for Integration and Social Changes

Main research tasks: power and social stratification, elites, local governance and local power relations, sustainable consumption, governance and global warming, environment and regional development, development policies, the consequences of EU development policies and projectification, the new system of redistribution, town policies, urban and rural competitiveness, urban and rural development, social changes in cities and rural areas, inequalities and organisations, inequalities in the world of work.

4) Research Department for Theory and Methodology

Main research tasks: the theories and research practices of sociology and interdisciplinary social sciences, sociology of knowledge, social history, community development and active citizenship, human rights, offense and punishment, (public) health and social well-being.

Besides programmes linked to project resources, complementing and summarising them, institute level research cooperation was going on in the following areas:

- the comparative synthesis of values and culture studies,
- the research of old and novel features and dimensions of social reproduction in a new theoretical framework,
- the analysis of the market and redistributive coordination of social redistribution.

The realisation of the major basic research projects of the institute was based on EU and national resources.

An outstanding task of the institute in 2012 was the preparation and publication of the volume of studies on the integration and disintegration processes of Hungarian society.

Another major research area was equal opportunities, dealing with the study of all the essential issues of social policy, and revealing interethnic relations.

II. Remarkable research and other results in 2012

a) Remarkable research and other results

A major outcome of the institute was writing and publishing the volume of studies in December 2012, on the integration and disintegration processes of Hungarian society. The majority of the researchers of the institute contributed to the book with original papers.

Among further research outcomes, the following need to be highlighted:

Research of the growing awareness of rights linked to equal treatment continued, supported by the Office for Equal Treatment (Egyenlő Bánásmód Hatóság), the second collection of data was completed during the year.

An important research project is “The born and unborn children of the system change: the influence of socio-cultural circumstances of birth on demographic processes” (OTKA), a follow-up panel research. The aim of the research is the follow-up of people’s and families’ lifepaths who had been interviewed 20 years ago, and involving children born at that time in the research. This made it possible for the younger generation of family socialization and background effects in several elections, maternity-related attitudes, and the family was facing young to start a family, child and / or work plans and design.

During the year the AIDS prevention research ISN2 (Budapest Chances) was continued in cooperation with Medical College of Wisconsin CAIR Institute.

Emphasized the continuity of the institutional tasks of domestic violence against men and women in research in Europe, with a background in the theoretical and methodological considerations at home and serve as a model for international comparative work. In 2012 this process continued (Public Health Executive Agency, EU).

The sociology of knowledge in 2012, continued monitoring of the radical analysis.

Value and culture research project at the European Social Survey (ESS) / European Social Survey (EUTE) data analysis as well as the inclusion of the ESS data preparation continued. The plan is a two-way cultural studies following tests were made:

- The role of culture in the public sphere and the functioning of democratic institutions more efficient operation of the system, the society is complex, difficult to understand the processes transparent, active participation in the exploration of possibilities.
- Hungary in the international integration of cultural patterns, changing identities and international participation in the public spaces of the characteristics of research.

Continued in the Voice of the 20th Century Building Archive OTKA grants and new applications, the researchers prepare for enlargement.

The basic research institute took place in the tradition of environmental change, regional development policies, and on the individual and his place of residence influenced the modes of consumption and rural development research. The PROSUITE (EU) research continues twenty-five member consortium: the project demonstrates how technology can be combined with the predictions of the life cycle approach in how to develop and integrate the three dimensions of sustainability. The sustainability of civil society groups and NGOs in project research is based on an intensive cooperation in 2012. Its main objective was to create links between the EU level, civil society and sustainable development among researchers.

During the year ended on Gildan (EU FP7) project, which dealt with issues of household energy use. Important focus was the problem in urban and rural as well as various models of government green policy effectiveness. The research took place in five Member States. The LAG Finnish-Hungarian joint project was completed in 2012, is an English-language edition of the preparation of the volume, which is the subject of one of the most important development in the EU system of comparative analysis. The book will be released in 2013.

The old women in partner violence by reducing the possibility of dealing with the project in which the processing of files police have set up a database and the police and the social sector professionals working in educational materials have been developed. Completed in 2012, the HIV Prevention within High Risk Social Networks - International Social Network Study II. American-funded research project is part of a youth violence prevention in Youth Deviance and Youth Violence: A European multi-agency perspective on best practices in research on prevention and control.

Rights awareness of equal treatment growth rate - with focus on women, the Roma, the disabled and LGBT people (Equal Treatment Authority, 2010-2013), born of the regime and their unborn children: the birth of the impact of socio-cultural conditions and demographic change (OTKA, 2011-2013);

Multiple discrimination: individual and institutional perceptions, impacts and actions (OTKA, 2012-2014).

The values, knowledge and research in the sociology of culture, history and memory research in the archives of the continued collection and processing, which is based on several pillars. One of the domestic history of sociology of the school founder-builder persons life interviewed, they made a qualitative research, publications, through preparing the second of memory research, national and international materials of, whereas the third is a OTKA undertook a qualitative collection and database construction, processing means. (3 proposals

were submitted, many foreign language publications, conference presentations and media appearances.)

The other group of values and cultural changes in behavior patterns analyzed, inclusive of the various social groups ranging from attitude research institutions operating mechanisms of the culture transfer phenomena revealing the presentation and interpretation. (Hungarian and English language books, papers have appeared on the subject.)

The third group of the knowledge and information society, reflected recent phenomena, particularly the elites and the society experienced radicalization.

Social inequalities in relation to multiple discrimination: individual and institutional perceptions, impacts and actions; Frames of Life in prison and beyond. Subjective re-socialization opportunities, the birth-anniversary box OTKA and the equal treatment Rights awareness growth rate - with focus on women, the Roma, the disabled and LGBT people, "c. Projects-line research tasks were conducted. Year 2012 started the ESS Hungarian research in the next phase of the preparation and of the Roma policy institutionalization c. research. the three had started international research, while in 2012 two European research grants awarded to MOPACT (Mobilising the Potential of Active Ageing in Europe in FP7 and the space (Teachers' Education for Roma New Opportunities in School) project under the LLP.

The integration of research and social change organizations and working groups of the three sociological research, the institute running international projects. One is the aging of the European population is significantly influencing the labor market integration of educational and training activities in international comparative analysis and evaluation, identification and dissemination of best practices, the practice needs better economic policies was to facilitate appropriate training. In the years during which the participating countries, higher education and adult education institutions to analyze factors influencing the practice, as well as two case studies in the Hungarian higher education institutions in adult education activities. The next project is munkaidőrezsimek productivity and working conditions revealed the impact of the context of two case studies. The third project of the global financial and economic crisis on the impact of the supply chain. The project results are summarized in three English-language publications.

The countryside and elite Study Group (EU-FP7) Governance, infrastructure, lifestyle and energy consumption changes during the project: coal, oil, and natural gas-based power generation following years Europe theme analysis, which showed that households make use of the energy produced 35% of household consumption and greenhouse gas emissions caused by 40%. Thanks to the technological innovations appeared in an economical and environmentally-friendly energy production methods. The research examined the population in five European lifestyle, energy consumption habits and consumption patterns. The third aim was to give a picture of the past two decades, the transformation of agriculture, rural society changes. An important result "of integration and disintegration of the Hungarian Society" OTKA project preparation, this book is based on published results. Another three English-language studies on global changes and rural-themed book was published.

The city and environmental sociology research team this year closed a three-year research supported by OTKA, Hungary, the new cities of the social characteristics of the regional development processes, the relationship between urban centers and the surrounding area, revealed conflicts. As a result, it was found that the transition to globalization and the consequences of being a historically evolved traits, and that as a result of modernization

effects to speak of a new urban development model of the organization. The facts are that there are no pure types, and clear answers to the old town with a comparison of the trends of convergence, the differences are indicated. The results are presented in groups of two international conferences, one in English and the volume has been created. The group's work is a result of more recent winners OTKA project that the Central and Eastern European and Hungarian comparisons of new towns, survey to explore the processes of social polarization.

In the year 2012, four researchers received a PhD degree.

b) Dialog between science and society

Both nationally funded projects and international cooperations aim at disseminating the research results at professional forums as well as to the general public. Workshops, press conferences, book launches, media presence, and trainings provided the opportunity to present the research results. Socio.hu, the online critical, scientific journal of the institute published four issues in 2013, available to anyone interested as a forum for social science publications, discussions, and analyses.

The dissemination of research findings among laypeople increased attention in 2012. In addition to radio and other media appearances, as in every year, so last year was included in the "Day of Hungarian Science" event. The Institute staff event, organized by the Scientific Secretary TK.

Most instructors are active researcher, English and Hungarian languages are taught at CEU, Corvinus, the ELTE University of Debrecen, MOME, IBS, the dark, the King James Version university.

III. A presentation of national and international relations

International co-operation in the first place a new relationship emphasized cooperation agreement with the Institute of the Chinese Academy of Social Sciences Institute of Sociology of comparative research in a multi-volume English-language preparation and Social Changes Title of New Emerging Market Economy.

Researchers in the year 2012 during the high activity at national and international conferences respectively. The institute's staff as participants or speakers visited 126 times in international conferences, performances are mostly made from the conference have been published in publications. 84 national conference participation were registered, including MSZT annual conference session as a leader and presenter.

The international activities should be highlighted in the 4 th grade host 4CITIES UNICA Euromaster in Urban Studies Program in Budapest module. And the Austro-Hungarian Action Foundation implemented with the support of international, involving young regionalist organization of seminars, and based on the volume of studies published in English. During the year, the French scientific relations is a further strengthening of the numbers can be added.

28 national research institutions, university education (both as an assistant professor, associate professor three, five and a university or college teacher - two of them were permanent staff and three part-time and ten hours of taxes). In 2012, 62 theoretical and 44 practical courses were held, 105 thread lead themselves, and 22 PhD dissertations produced by students dealt with. Three of them are taught in foreign universities. 18 graduate school in 2012, taught in the Institute.

A non-exhaustive listing, and not to mention the domestic institutions, international institutions, the following were related to the ongoing work of researchers in 2011:

Aberdeen University, Skócia; American University, Biskek, Kirgízia; Bécsi Egyetem; Brüsszeli Vrije Universiteit; Bukaresti Egyetem; Centre for Central and Eastern European Studies, University of Glasgow; CETEMSA, Barcelona; CNRS, UMR Géographie –Cités; Dokumenta (Zágráb); European Centre Vienna & INRCA; European Humanities University, Vilnius; European University, St. Petersburg; INRCA, Ancona; FU, Berlin; GMS, London; Görlitz, Fachhochschule; Gumiljov Egyetem, Astana, Kazahsztán; Harkovi Tudományegyetem; Harvard School of Public Health, Department of Environmental Health, Boston, USA; Heidelberg University & BAGSO, Germany; Hessische Stiftung Friedens- und Konfliktforschung, Németország; Hitotsubashi University, Tokyo; Hofstra University, New York; IGOP (Spanyolország); Ingrid Sharp, University of Leeds; INRCA & European Centre Vienna; Institute Arbeit und Technik, Gelsenkirchen; Institute for Employment Studies, Brighton; IPTS; IVO, Pozsony; Jenai Egyetem; Karta Foundation (Varsó); Kings' College London; Kobenhavns Universitet, Dánia; Krista Crowman, University of Lincoln; Kyoto University; Leeds University; Leiden University; Lengyel Társadalomtudományi Doktori Iskola, Varsó; Leslie Haddon – London School of Economics; Liberalis Iniciativa, Pozsony; Liberaljana Misszia, Moszkva; Lomonoszov Egyetem, Moszkva; LTA Szociológiai Intézete, Varsó; Masaryk Egyetem (Brno); Masarykova Egyetem Brno; Mauthausen Memorial (Bécs); Medical University Hamburg Eppendorf, Germany; Memorial (Moszkva); Midsweden University; National Institute of Public Health, Greece; National School of Public Health Greece; National University of Ireland, Maynooth; Német Szociológiai Társaság, Berlin; Network of Independent Experts on Social Eric Marlier (CEPS/INSEAD Luxemburg); New Economics Institute, USA; Osztrák Tudományos Akadémia; Paris 8 Egyetem, Police University, Germany, Münster; Porto University; Potsdam Institute for Climate Impact Research (Germany); RTA Közgazdaságtudományi Intézet, Moszkva; RTA Szociológiai Intézet, Moszkva; Scientific Research Centre of the Slovenian Academy of Sciences and Arts, Department for Interdisciplinary Research in Humanities (Ljubljana); Sevcsenko Tudományegyetem, Kijev; SNFCCC; SSH, Bécs; St. Georges University, London; Stockholm University; Stockholms Universitet, Svédország; Strathclyde University, Glasgow; Sustainability Management, Local Governments for Sustainability, ICLEI (International Council for Local Environmental Initiatives); Szlovák Tudományos Akadémia, Szociológiai Intézet; Tbiliszi Állami Egyetem, Grúzia; Tel Aviv University, Tel Aviv, Izrael; The Macaulay Institute in Aberdeen, Scotland; The University of Groningen (the Netherlands); The University of South Bohemia (Czech Republic); The University of South Bohemia (Czech Republic); Tilburg Universiteit, Hollandia; Toronto University, Canada; Trento University; Ukrajnai Tudományos Akadémia, Szociológiai Intézet, Kijev; UNDP Europe and CIS, Bratislava; United Kingdom Climate Impacts Programme, Oxford; Università degli Studi di Modena e Reggio Emilia, Reggio Emilia; Universitatea Babeş-Bolyai, Románia; Université Victor Segalen Bordeaux, Franciaország; Universiti of Helsinki; University College London; University of Barcelona; University of California Los Angeles; University of

Glasgow; University of Granada; University of Leeds; University of Ljubljana; University of London; University of Nottingham; University of Padova; University of Rovira i Virgili, Tarragona; University of Stirling; University of Stockholm; Uppsalai Egyetem, Svédország; UTA, Dobrov Központ, Kijev; UTA, Közgazdaságtudományi Intézet, Kijev; Visual History Archive (Berlin); Viszsaja Skola Ekonomiki, Moszkva; Wissenschaftsladen Wien; Wodrow Wilson Center, Washington; WZB, Berlin; ZOOM; ZSI, Bécs.

IV. Brief summary of national and international research proposals, winning in 2012

The year 2012 started out in collaboration with the PTI, Hungary's participation in the European Social Survey. This whole national social science projects supporting public service.

In 2012 won the tender of a number of European research institute. Now start the MOPACT (MOBILISING THE POTENTIAL OF ACTIVE AGEING IN EUROPE) FP7 project. Further support for the space project was now under the LLP. It is important to mention the significant fund promising research cooperation, Judit Takács Families And Societies initial management of FP7 project.

The jury OTKA Sociology, Demography of the Hungarian Academy of Sciences in 2012 SZI TK was the most successful sociological research unit. Three applications were supported.

The institutionalization of Roma policy c. OTKA projects were awarded grants this year. The Urban and Environmental Sociology research team's work led to a new year's winner OTKA project that the Central and Eastern European and Hungarian comparisons of new towns, survey to explore the processes of social polarization. In 2012, he won the OTKA also include homosexuality in the 20th century social history of pre-1990 Hungary's research project.

V. List of important publications in 2012

Az 'integrációs kötet' az intézet munkatársainak összefogásával:

Kovács Imre, Dupesik Csaba, P. Tóth Tamás és Takács Judit (szerk.): *Társadalmi integráció a jelenkori Magyarországon*. Argumentum, Budapest, 2012.

Nemzetközi kötet
